

# M Corp

se lōō' shen:  
Webster's defines it  
as the act of solving  
a problem or question.

You will soon  
define it as M Corp.

## How We Began

In 2003, M Corp started, literally, in a garage. Among tools and trimmers, the three founders, Alex, Chuck and Hung, started small but dreamed big. Based on a foundation of their deep knowledge of legacy mainframe systems, Medicaid/Medicare systems, business intelligence & analytics, mature and tested methodologies for successful system delivery, and data driven management consulting, they built their vision and their organization.

Now, M Corp is larger, with over 100 consultants delivering winning solutions everyday. M Corp has expanded their square footage and their client list, but their philosophies and character are deeply rooted in that small garage. They still believe in and practice the core values that launched their business back in 2003: solve problems, integrate systems and deliver solutions.

## What We Do

M Corp provides a wide range of management and technology consulting, specializing in the industries of Government, Agriculture, Oil & Gas and Health & Life Sciences.

We are recognized for our ability to deliver successful projects. On time. On budget. As promised. At the core of our approach is our methodology for operationalizing solutions, making them more integrated with your environment and culture, resulting in systems and processes that are accepted, adopted and valued by your users.

## What We Offer

With each project, we offer an elegant combination of tested, reliable methodology and unique, customized solutions for our clients.

### BUSINESS INTELLIGENCE & ANALYTICS for better business decision-making

As a SAS Silver Partner, M Corp offers a broad range of analytics and business intelligence solutions and services.

Our unique solutions allow us to gather raw data from diverse sections of your company, break it down along different dimensions, do the analysis, run the reports, sift through the observations—and most importantly—make smart use of that information so your business will run more profitably.

### LEGACY MIGRATION for better business agility

M Corp uses our fully developed and proven legacy migration model to execute complex legacy system conversion and migration projects that stabilize environments and move your organization to modernization. Our Legacy Framework utilizes automated conversion tools from our partner, Ateras and fully developed testing methodologies using HP Quality Center. This winning combination allows a complete and seamless transition to a modern platform for you and your business.

Our experience includes extensive involvement with State of California legacy systems; combine that with our track record of success and you'll get one of the lowest risk and most effective, efficient solution providers in the market. Our Legacy Practice supports migrations from COBOL, Assembler, CICS, Natural, IDMS, Adabas and VSAM to modern, current technologies.

## SOLUTION FRAMEWORKS for proven results

M Corp has proven, integrated and flexible frameworks utilizing custom and COTS/MOTS tool sets that offer existing production-proven solutions for:

**Outcomes Measurement**

**Licensing**

**Fraud & Risk Management**

**Food Safety**

**Safety Inspection**

**Case Management**

**Quality Management**

**Incident Management**

**Content/Knowledge Management**

**Health Record & Laboratory Data Management**

**Inspection**

**Royalty Accounting**

## ON-DEMAND RESOURCING & SERVICES for flexibility

We recognize that every need is not about a project or a solution. Sometimes you just need the right people with the right experience for on-demand resourcing. M Corp is made up of a seasoned, dedicated staff with exceptional qualifications to deliver value on demand. We can help you with your strategic planning, assessments, business process analysis, requirements definition, project management, change management, system maintenance, IV&V and testing.
